E-Mail: [REDACTED]

**Re: Acknowledgement of FOI request IE\_FOI\_458**

Dear [REDACTED],

I refer to your request dated 29<sup>th</sup> March 2021 made under the Freedom of Information Act 2014, which was received on by my office on that date, for records held by Iarnród Éireann.

**Request:**

I am seeking the following information regarding procurement contracts which I would be grateful if you could furnish me with. I am seeking the full list of contracts issued by your organisation in the years 2018, 2019 and 2020 which would have contained a social clause. A social clause is a provision in a procurement contract which seeks to promote a certain goal be it environmental, labour activation, gender balance, etc.

In 2019 the Department of Public Expenditure and Reform and the Department of Communications, Climate Action and Environment, jointly issued Circular 20/2019: Promoting the use of Environmental and Social Considerations in Public Procurement. Certain bodies have already included such provisions in recent contracts and I am attempting to ascertain whether yours has done the same.

In the event such contracts are identified I am seeking the following information in tabular form:

- The nature of the contract work
- The value of the contract work
- The date of the contract work
- The type of social clause included (environmental, social, etc)
- A description of the social clause included

**Response:**

Please find attached documentation as requested

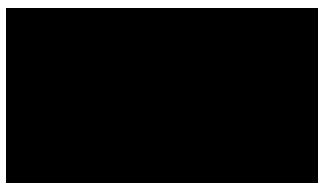

**Rights of appeal**

In the event that you are not happy with this decision you can make an appeal in relation to this matter, you can do so by writing to the FOI Unit, Corporate Communications, Iarnród Éireann Irish Rail, Connolly Station, Amiens St, Dublin 1 or by e-mail to [foi@irishrail.ie](mailto:foi@irishrail.ie). You should make your appeal within 4 weeks (20 working days) from the date of this notification, where a day is defined as a working day excluding, the weekend and public holidays, however, the making of a late appeal may be permitted in appropriate circumstances.

The appeal will involve a complete reconsideration of the matter by a more senior member of the staff of this body.

Should you have any questions or concerns regarding the above, please contact the FOI Officer on [REDACTED] or by email at [foi@irishrail.ie](mailto:foi@irishrail.ie)

Yours sincerely,

**Freedom of Information Executive**

Freedom of Information Request:  
 Schedule of Records for **IE\_FOI\_431** : Summary for Decision Making

2	29-Apr-21	IE_FOI_458		Part Grant	S36	

Signed: [REDACTED]

Freedom of Information / Data Protection Executive

## IE\_FOI\_458 Response

In response to your recent request for information regarding procurement contracts issued by IE in 2018, 2019 and 2020, which comply with the provisions and instructions of Circular 20/2019 , “Promoting the use of Environmental and Social Considerations in Public Procurement”, please see attached spreadsheet. The attached document includes details and examples of tender processes for the supply of goods, services or works with a reduced environmental impact as well as those contracts which included “green criteria” and “social/environmental clauses”. These contracts demonstrate compatibility with the objectives relating to the protection of the environment and combatting climate change as well as disability access and inclusivity.

IE contracts contain provisions as standard, which require the supplier/contractor to comply with all applicable obligations in the fields of environmental, social and labour law applying under national and EU law as well as various international conventions on social, environmental and labour law matters “at the place where the works are carried out or the services provided”. All applicants who seek to qualify for the tender short list must execute a declaration of eligibility stating that they have not failed to comply with their obligations in this regard for a public contract.

IE contracts also contain specific pay and labour conditions clauses. E.g. in the standard IE contract for the purchase of goods, Section A6 (1) outlines below requirement:

### **A6 Supply of Goods and Supplier's Obligations**

(1) *The Supplier shall supply the Goods to IE for the Charges in accordance with (a) the terms and conditions of this Contract (which includes the Schedules), (b) Good Industry Practice (c) applicable Law, including but not limited to all obligations in the field of environmental, social and labour law that apply at the place where the Goods/services are provided, that have been established by EU Law, national law, collective agreements and by international, environmental, social and labour law listed in Annex XIV of the Utilities Directive, and (d) in compliance with IE Standards, at the times and on the dates and to the Delivery Points as set out in the Contract or as otherwise notified in writing by IE to the Supplier. The sale of the Goods to IE shall be deemed to include the provision to IE of all related manuals, technical instructions, log books, warranties, guarantees and other documentation provided by the Supplier or any other person on its behalf.*

With regard to the application of “green criteria”, please note that criteria to assess suppliers’ approach to environmental issues are used as standard selection criteria in IE’s Pre-Qualification Questionnaire, with the majority of tenders run in 2018, 2019 and 2020 requesting applicants to provide copies of their documented Environmental Management System or Environmental Policy. The full list of contracts is provided in the second sheet in the attachment.

Recently, more focus has been put on developing the criteria further to apply a more meaningful assessment of suppliers relevant to the subject matter of the tender. An example of this is the recent tender to establish a framework agreement for the supply of ballast. Further details are included in the attached document.

Furthermore, where appropriate, IE uses life cycle cost or whole life cost criteria to evaluate tenders, taking into consideration not only the capital costs but also the long term operational and maintenance costs as well as the reliability of the system/equipment and the path to obsolescence. Also, where appropriate and relevant to the subject matter of the contract, specific criteria relating to sustainability are used. An example of this is the recent tender to establish a framework agreement for the supply of new electric rolling stock.

The Circular references the appropriate training of procurement personnel in Green Procurement. This is an area of focus for the IÉ Procurement team in 2021 and so far this year, members of our team have attended a training programme developed by EPA. We are also part of a sustainability steering group at CIE Group level and also participating in the Business in the Community programme. It is anticipated that with further training, the ability to develop and expand the green criteria will improve within the IÉ Procurement team.

Finally, it is noted that the Circular specifically references the need to ensure access to tenders by SMEs. IÉ recognises the value of SME's and local suppliers to our organisation. When considering the consolidation of requirements into long term agreements, IÉ is always cognisant of the need to ensure that SMEs and local suppliers continue to have access to our tenders. For example, when establishing framework agreements for Building & Civil Works, three separate tender process were carried out and turnover was set out in accordance with the value of the contract, 1)tender values under 100k, 2)tender values €100K to €1m, 3)tender values €1m to €5m. This encourages more SMEs to participate in the competition.

The move to e-tendering and digital execution of documents has also facilitated this improved access to tender opportunities as well as the interface between IÉ and the supplier.

Please do not hesitate to contact me if you have any further queries.

**Irish Rail Tenders Promoting Use of Environmental or Social Consideration**

Item No.	Year	Contract Title/ Nature of the Work	Value of Contract	Duration of Contract (Date of Commencement and Expiry)	Green Selection Criteria (Tick Box and Provide Wording)	Green Award Criteria/ Conditions of Tendering (Tick Box and Provide Wording)	Environmental or Social requirement in Scope of Services or Specification	Environmental or Social Clause in Terms and Conditions
1	2019	Framework Agreement for the Leasing of Cars and Vans		3 Years	Yes - The selection criteria requested applicants to provide a copy of their Environmental Policy.	Yes- The award criteria is based on Whole Life Cost "WLCC" - Tenders will be evaluated on the basis of their life cycle cost including lease +maintenance + estimated fuel cost over the period of the lease.	The scope of the agreement includes the leasing of electric and hybrid vehicles	N/A
2	2019	On Board Catering Services		3 - 5 Years(06/01/2020)	The selection criteria requested applicants to provide a copy of their Environmental Policy.	Tenders were assessed on the basis of their methodology for waste management.	The Scope of Services requires the service provider "where possible promote the use of 'Fair Trade' products within the catering offer" and also "to dispose of train waste in an environmentally conscious manner.	N/A
3	2021	Framework Agreement for the Supply of new Rolling Stock involving the supply of electric multiple vehicles (EMU) and battery electric multiple vehicles (BEMU)		Contract to be awarded in Q3 2021. Contract 1 – 10 Year Framework Agreement Contract 2 – 15 Year TSSSA	Sustainability Management P	Sustainability (2.5%) Operational Cost – Energy Consumption (7.5%)	4.3.1 - A whole life environmental impact assessment in line with ISO 14040 (Environmental management - Life cycle assessment - Principles and framework) shall be undertaken in line with waste hierarchy principles. This shall cover rolling stock construction, manufacture, delivery, operation, maintenance/overhaul, and end-of-life. Environmental impacts to be considered include energy usage, emissions, water usage, materials usage, waste, pollution, and noise and vibration. 4.3.2 - A description of how 'Design for Disassembly' principles have been adopted by the Manufacturer shall be provided, and shall cover issues such as the marking of plastics and avoiding the blending of materials. 4.3.3 - Based on the terms defined in ISO 22628 (Road vehicles - Recyclability and recoverability - Calculation method), targets for end of life recyclability and recovery shall be stated. An End of Life Manual shall be provided detailing the disassembly, identification and segregation methods. This shall include the end of life disposal methods for each component. 4.3.4 - The Units shall comply with the following regulations: <input type="checkbox"/> European Union (Waste Electrical and Electronic Equipment) Regulations 2014, as amended. <input type="checkbox"/> European Union (Batteries and Accumulators) Regulations 2014, as amended. <input type="checkbox"/> European Union (Restriction of Certain Hazardous Substances in Electrical and Electronic Equipment) Regulations 2012, as amended. 6.13.1 - The Units shall be provided with an electric braking system which can maximise the recovery of braking energy. 6.13.2 - All the energy recovered by the traction system during braking (other than any electrical losses) shall, where the infrastructure permits, be returned to the OHLE, except for that used to charge the traction batteries, where fitted, or, to supply the	None Specifically
4	2020	Framework Agreement for the Supply of Ballast (7595)		2020 to 2024 Framework	N/A	Applicants are required to provide a copy of their environmental policy. The environmental policy should cover commitment to pollution prevention, mention developing environmental targets and objectives and also a commitment to continual improvement.	2.2.1 Track ballast supplied to Iarnród Éireann must be hard, durable, natural crushed stone of a quality which satisfies the requirements of this specification.2.2.2 Ballast must be produced without blending material from different geological sources. 2.2.4 Ballast must be free from chemical contamination and all clay soil and cohesive particles.	N/A
5	2020	Information System-consideration for accessibility for all passengers- as per the board paper "The new system is compliant with the European Railway Agency's People with Reduced Mobility Technical Specification for Interoperability (PRM-TSI) and will display all of the letters in the Irish and English alphabets"		2020-2024	N/A	The environmental policy should cover commitment to pollution prevention, mention developing environmental targets and objectives and also a commitment to continual improvement.	5.4.4 The PIS controller will make automated announcements in both Irish and English (audio & text). 5.5.3 Displays shall be capable of displaying messages in both English and Irish languages in multi lines and pictograms. 5.5.4 Displays shall be capable of displaying all the set of characters for the Irish Gaelic Language as established in the Irish Standard Specification for 'Information Technology – Irish 7-bit Coded Character Sets' (I.S. 433:1999), and in the 'Information Technology – 8-bit single-byte coded graphic character sets' (ISO/IEC 8859-15:1999).
